

<b>Animals, including humans</b>		
	<b>Skills and Knowledge</b>	<b>Key Vocabulary</b>
EYFS Animals	<ul style="list-style-type: none"> <li>• identify something as an animal</li> <li>• name some places animals live</li> <li>• identify and locate parts of their body</li> <li>• identify and locate parts of animals bodies</li> <li>• use their observations to describe humans and other animals</li> <li>• name a very limited range of food</li> <li>• can identify types of exercise</li> <li>• name baby, child, adult and the young of some other animals</li> </ul>	Animal, head, legs, arms, knee, elbow, neck, face, feet, hands, bread, potatoes, apples, cereals, rice, meat, fish, milk, running, jumping, swimming, walking, chicken, hen, kitten, cat, puppy, dog, duckling, duck
Year 1 Animals	<ul style="list-style-type: none"> <li>• identify and name a selection of animals</li> <li>• identify and sort animals into different groups</li> <li>• name the different groups of animals</li> <li>• identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals</li> <li>• make observations of animals</li> <li>• know that animals eat different types of food</li> <li>• identify the food of some common animals</li> <li>• recall and use the words: carnivore, herbivore and omnivore</li> <li>• identify and name a variety of common animals that are carnivores, herbivores and omnivores</li> <li>• group animals that belong to: carnivores, herbivores and omnivores</li> <li>• use their observations to point out differences between humans and other animals and between animals and non-living things</li> <li>• describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)</li> <li>• identify and locate the sense organs</li> </ul>	Body parts: eyes, ears, elbows, hair, mouth, nose, teeth, paw, hoof, tail, fin, shell, skin, wings, beak, fir, scales, feathers Fish: goldfish, tuna, salmon Birds: blackbird, magpie, robin, sparrow, crow, swan. Reptiles: snake, lizard, tortoise Mammals: mouse, horse, cow, sheep,

	<ul style="list-style-type: none"> <li>• use senses to describe textures, sounds and smells</li> <li>• compare differences in texture, sounds and smells</li> <li>• name and locate the basic parts of the human body</li> <li>• draw and label a simple body outline</li> <li>• describe differences between the different animal groups (e.g. birds have feathers but mammals have fur)</li> <li>• identify animals which are more likely to be seen in different seasons</li> <li>• explain why some animals are only seen at night</li> </ul>	<p>hamster, rabbit</p> <p>Amphibians: frog, toad, newt</p> <p>Senses: feel, hear, smell, see, taste, touch</p> <p>Carnivore, omnivore, herbivore</p>
Year 2 Growth	<ul style="list-style-type: none"> <li>• recognise that animals produce young</li> <li>• notice that animals, including humans, have offspring which grow into adults</li> <li>• recognise changes that take place as animals get older</li> <li>• explain that adult animals no longer grow</li> <li>• describe some differences they observe between babies and toddler</li> <li>• make comparisons of the differences they observe between babies and toddlers</li> <li>• identify the offspring of a selection of different animals</li> <li>• use evidence to show that adult animals no longer grow</li> <li>• use evidence to show that children of the same age are not all the same size</li> <li>• use evidence to show that older children are generally taller than younger children</li> <li>• find out about and describe the basic needs of animals, including humans, for survival (water, food and air)</li> <li>• explain how to look after a pet describing what it needs to survive</li> <li>• describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene</li> <li>• recognise that exercise is important</li> <li>• name some types of food</li> <li>• identify some types of food that make up their diet and name some examples of each</li> <li>• recognise that an adequate diet and exercise are necessary for them to grow and stay healthy</li> <li>• describe some of the types of food that they eat</li> </ul>	<p>Baby, toddler, adult, eggs, fruit, vegetables, water, fibre, meat, fish, cheese, beans</p> <p>washing, exercise, diet offspring</p>
Year 3 Healthy Bodies	<ul style="list-style-type: none"> <li>• identify some foods needed for a healthy and varied diet</li> <li>• name the components of a healthy and varied diet</li> <li>• describe how their diet is balanced</li> </ul>	<p>Balanced diet, carbohydrates, protein, fats, fibre, fruit and</p>

	<ul style="list-style-type: none"> <li>• identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat</li> <li>• describe the role of different food groups</li> <li>• compare and contrast diets of animals including pets</li> <li>• describe an adequate and varied diet for humans, recognising that there are many ways of achieving this</li> <li>• know they have bones and muscles in their body</li> <li>• state that they and other animals have skeletons</li> <li>• identify animals that do not have an internal skeleton (invertebrates)</li> <li>• group animals with and without an internal skeleton</li> <li>• describe some advantages of having an internal skeleton over no skeleton or an exoskeleton</li> <li>• describe some observable characteristics of bones</li> <li>• describe the main functions of their skeletons</li> <li>• state that movement depends on both skeleton and muscles</li> <li>• state that when one muscle contracts another relaxes</li> <li>• identify that humans and some other animals have skeletons and muscles for support, protection and movement</li> <li>• recognise that their skeletons grow as they grow</li> <li>• describe problems associated with broken bones or bones disease</li> </ul>	vegetables, bones, muscles, femur, ribs, spine, tibia, shoulder blade, hollow, relax and contract, protect, support, internal skeleton, exoskeleton
Year 4 Teeth and Digestion	<ul style="list-style-type: none"> <li>• identify a wider range of body parts, including some internal organs (large intestine, small intestine, brain, lungs, heart, stomach, oesophagus)</li> <li>• locate and name the different organs in the digestive system</li> <li>• describe the role of each organ in the digestive system</li> <li>• describe the simple functions of the basic parts of the digestive system in humans</li> <li>• explain why food needs to be broken down</li> <li>• recognise they need to take care of their teeth</li> <li>• name the different types of teeth</li> <li>• describe the role of each type of teeth in digestion</li> <li>• identify the different types of teeth in humans and their simple functions</li> <li>• explain how they should look after their teeth and recognise why they need to do so</li> <li>• explain why dentists are concerned about the amount of sugar children have</li> <li>• state that animals have different diets and may have different kinds of teeth</li> <li>• explain how fossilised teeth give us clues about an animals' diet</li> </ul>	Teeth and eating: incisor, molar, canine, diet, decay, healthy, teeth, acids, sugars, mouth, rip, tear, chew, grind Digestive system: saliva tongue, toilet waste, nutrients energy, stomach, large/small intestine, brain, lungs, movement,

	<ul style="list-style-type: none"> <li>• explain why the teeth of certain types of animals need to be different</li> <li>• explain why humans do not have a full set of adult teeth at birth</li> </ul>	acids, urine, faeces, oesophagus
Year 5 Life Cycles	<ul style="list-style-type: none"> <li>• describe the changes as humans develop to old age</li> <li>• identify ways in which the appearance of humans changes as they get older</li> <li>• identify some characteristics that will not change with age</li> <li>• recognise stages in growth and development of humans including puberty</li> </ul>	New born, infant, child, teenager, puberty, adult, wrinkles, grey hair, height, weight,
Year 6 Health and the Human Body.	<ul style="list-style-type: none"> <li>• identify and name the parts of the circulatory system</li> <li>• know that the heart is made of muscle</li> <li>• describe what the heart and blood vessels do</li> <li>• identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood</li> <li>• state how to measure pulse rate</li> <li>• recognise that pulse rate is a measure of how fast the heart is beating</li> <li>• discover that during exercise the heart beats faster to take blood more rapidly to the muscles</li> <li>• make careful measurements of pulse rate</li> <li>• describe the different functions of the blood (e.g. transporting and protecting)</li> <li>• know that the blood comes from the heart in arteries and returns to the heart in veins</li> <li>• know that blood carries oxygen and other essential materials around the body</li> <li>• explain how ideas about the circulatory system have changed over time</li> <li>• identify some of the harmful effects of smoking</li> <li>• recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans</li> <li>• recognise that care needs to be taken with medicines and that they can be dangerous</li> <li>• give several reasons why it is sometimes necessary to take medicines</li> <li>• identify some harmful effects of drugs</li> <li>• identify food as a fuel for the body</li> <li>• name the major groups into which food is categorised and identify sources for each group</li> <li>• describe the main function of organs of the human body</li> <li>• explain the effect of diet on particular organs of the body / aspects of health</li> <li>• explain the effect of exercise on particular organs of the body/aspects of health</li> <li>• explain how ideas about smoking have changed over time</li> </ul>	Heart, veins, arteries, capillaries, blood, pulse, beats, oxygen, carbon dioxide nutrients, organs, drugs, medicines, minerals, vitamins, lungs, caffeine, medical, legal, illegal.

	<ul style="list-style-type: none"><li>• explain why advice on diet changes (e.g. butter vs margarine, five a day, tax on sugary drinks)</li></ul>
