

Early Years Curriculum Intent

Through language rich interactions and purposeful play, and taking into account their own interests and fascinations, children will be supported in developing positive relationships with themselves, their peers and the adults rooted in tolerance and respect, allowing them to fully engage with the curriculum that:

- challenges them to develop their spoken language so that they can share their thoughts, ideas and make comments about their own learning;
- enables them to engage in purpose and imaginative play
- encourages a love of reading and the confidence to talk about stories, poems and songs that they love
- supports them in the early stages of writing by providing them with experiences and the language to formulate ideas that they can use in their own writing.
- provides them with the fundamental building blocks of mathematics
- helps them to make sense of the world around them.
